CS 30700: Sprint Review Grading Rubric

1 Version Control (1.0 point)
   (a) All team members are required to consistently use version control system.

2 Weekly Reports (1.5 points)
   (a) Your current scrum master should submit weekly team reports to your project coordinator and the instructor.
   (b) Each individual should submit weekly individual reports to their project coordinator.
   (c) Make sure to tag each task with your version control commit identifiers (e.g. git commit hash) as necessary.
   (d) Both reports should be submitted via email by 11:59pm EVERY Sunday and no points will be given for late submissions.

3 Implementation and Testing (9.0 points)
   (a) Your implementation and demo should be based on the Sprint Planning Document. Please implement the tasks that you have planned in the document.
   (b) Each team member must present and explain the tasks they have worked on during the sprint.

4 Overall Presentation (1.5 points)
   (a) Ensure to prepare your demo before the meeting and do a dry-run.

Notes
   (a) Please arrange to meet with your Project Coordinator on the suggested meeting day (usually Friday) or one day before it.
   (b) If you have some tasks based on machine learning or data mining algorithms, and cannot avoid certain error rates, it is understandable for your application not to always produce correct results. No points will be deducted for the tasks which work reasonably well.

Total: 13 points (13% of your project grade)
